Scott, Jared,

Thanks for discussing the situation and describing the City's efforts to address the ammonia exceedances at the wastewater treatment plant. If you receive any additional information about the costs for biomonitoring and the general approach to assessing the origin(s) of the potential toxicity (e.g. initial and subsequent sampling locations within the collection system) as well as how long it may take the City to complete this assessment, please email the information to me.

Also, if you have any additional questions or concerns, please don't hesitate to contact me.

David
